

LAUNCH YOUR CAREER IN **MANUFACTURING**

1

LEARN ABOUT THE COMPANY.

Review their website and the job posting to ask yourself:

- What do they make and how do they make it?
- What type of manufacturing do they do?
- Who uses this product and why does it matter?
- Does the product connect to your own life in any way?

2

PREPARE YOUR APPLICATION.

Understand the job:

- Read the description and try to describe it in your own words.
- What tools or processes might you use on the job?

Make your resume stand out:

- Highlight skills and experiences related to making or fixing things.
- Consider adding photos of things you've made or repaired.

3

NAIL THE INTERVIEW.

Manufacturers value curiosity, precision, and learning.

- Talk about how you follow step-by-step instructions.
- Ask questions about how their products are made.
- Take notes to show you're engaged and ready to grow.
- Highlight experience that shows your relevant knowledge and skills.
